

THE COLLECTION · EDITION MMXXVI

Stella.

A long-format residence drawn in a single elevation — kitchen, bathroom and a quietly resolved open plan, wrapped in a sculpted timber-and-white shell, delivered ready to live in.

DESIGNED IN AUSTRALIA · DELIVERED READY

From \$73,900

A home need not be large to be complete. Stella gathers a full kitchen, a private bathing suite and a separate bedroom along one unbroken line — and asks nothing of the site but a place to rest.

What follows is a reading of that idea, room by room and finish by finish. Every surface shown here can be specified to your scheme; every figure is drawn from the build sheet. The result is a residence delivered whole — considered, relocatable, and ready to connect.

XIII	Dimensions	A TECHNICAL READING

From approach to within.

APPROACH

A sculpted shell sits low against the gums — soft white set off by silvered timber. Nothing louder than it needs to be.

THRESHOLD

Glass dissolves the line between inside and out. Step in, and the calm of the interior takes over.

WITHIN

Warm timber underfoot, architectural-grey walls and daylight drawn the length of the floor — the outdoors held softly inside.

*Daylight drawn across the floor — a room that
opens outward into the morning.*

COMPOSITE DECK · SLIDING GLASS ENTRY

STELLA · THE THRESHOLD

01

LIVING

Architectural calm, wall to wall.

The living end is a single uninterrupted volume — a long elevation of architectural-grey panelling, soft constellation downlighting and full-length timber-look flooring beneath a hand-finished ceiling. A wall of full-height sliding glass dissolves the boundary at the entry.

- ◆ Seam-resolved architectural-grey wall panelling
- ◆ Recessed warm-white constellation downlighting
- ◆ Premium timber-look hybrid flooring
- ◆ Full-height thermally-broken sliding glass entry
- ◆ Uninterrupted ceiling plane, concealed services

02

KITCHEN

Timber, set against stone.

Custom timber-veneer base cabinetry sits beneath full-height uppers, with an engineered stone benchtop, integrated splashback and a sculpted composite under-mount sink. Soft-close throughout, a gooseneck mixer with brass internals, and generous bench for everyday rituals.

- ◆ Timber-veneer base cabinetry with full-height uppers
- ◆ Engineered stone benchtop with integrated splashback
- ◆ Sculpted composite under-mount sink
- ◆ Gooseneck mixer, brass internals
- ◆ Soft-close push-to-open hardware throughout

*Veined stone, lit softly — a private hour set apart
from the day.*

MARBLE-EFFECT PANELS · FLUTED GLASS

STELLA · THE ENSUITE

vi

03

BATHING

A private bathing suite.

Wrapped wall-to-ceiling in soft-veined marble-effect panelling and divided by a slim fluted-glass partition. A walk-in shower, a sculpted white vessel basin on a marble-topped vanity, and a concealed-cistern WC arrive pre-installed — every fixture ready for final connection.

- ◆ Wall-to-ceiling marble-effect panelling
- ◆ Walk-in shower, frosted screen and rain head
- ◆ Sculpted vessel basin on a marble-topped vanity
- ◆ Slim fluted-glass partition
- ◆ Concealed-cistern WC, soft-close seat
- ◆ Black-framed mirror cabinet and ducted exhaust

04

BEDROOM

A separate sleeping suite.

Set behind a private door at the quiet end of the plan, with a full wall of floor-to-ceiling glazing drawing the outlook inside. Integrated wardrobes, generous storage and a calm finish — a proper sleeping suite, set apart from the living end.

- ◆ Separate bedroom with private door entry
- ◆ Floor-to-ceiling thermally-broken glazing
- ◆ Full-height integrated wardrobes
- ◆ Glass-fronted display and bedside storage
- ◆ Engineered flooring continuous from the living end

05

A SCULPTED SKIN

One continuous gesture.

Ribbed cladding curves around a softly capsule-formed body, met by a vertical timber feature at the entry. The roofline is concealed, the silhouette reads as architecture — a soft white form that belongs to the clearing it sits in.

CLADDING

Polyurethane composite, ribbed profile

ENTRY

Vertical timber-veneer feature panel

ROOFLINE

Concealed eaves, integrated gutters

STRUCTURE

Galvanised steel — Australian climate

Dimensions & Materials.

A TECHNICAL READING

EXTERNAL	INTERNAL	FOOTPRINT
L7200 × W2400 × H2550 mm	L7000 × W2240 × H2350 mm	26 m ² · 3,400 kg Lead time 12–15 wk

CONSTRUCTION

FRAME	Heavy-duty galvanised structural steel, load-rated for transport
PURLINS	Reinforced galvanised purlins and floor chassis
FLOOR	Engineered SPC hybrid plank over high-density fibre-cement
WALLS	Polyurethane composite cladding on bamboo-fibreboard lining
INSULATION	High-density polyurethane spray-in
GLAZING	Thermally-broken aluminium, toughened double-glazing, UV tint

SERVICES & COMPLIANCE

ELECTRICAL	Pre-wired · AS/NZS 3000 & 3001 compliant
MAIN	Heavy-duty main isolator with lock-out
CIRCUITS	Dedicated RCD/MCB protection on every circuit
SOCKETS	Double-pole · integrated USB-A and USB-C
PLUMBING	Pre-plumbed to kitchen & bath · threaded brass inlets
WASTE	100 mm PVC, P-trap · 50 mm PVC grey water
